EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Daniel McClure on 9 November 2005.

The application has been amended as follows:

In claim 4, line 4, change "commensurate" to – coincident --;

In claim 9, line 2, change "commensurate" to – coincident --; and

In claim 11, line 2, change "commensurate" to – coincident --.

2. The following is an examiner's statement of reasons for allowance: the prior art does not show the specific claimed order of asserting a bus request; disabling the clock to the requester; receiving the bus grant signal and in response to the grant enabling the clock.

3. The reference to Moyer et al., shows controlling a circuit to enter a low power operation mode, however the low power mode is initiated in response to no more requests being present on the bus, not in response to a request being present.

4. The reference to Gephardt et al. shows the issuance of a request to start the clock, starting the clock, and then issuing the grant signal. Gephardt does not show the claimed order in which the signals occur.

5. The reference to Poisner shows saving power by having devices ignore bus activity in the conservation mode except for monitoring the grant signal line for a negation of the grant signal. The negation of the grant signal wakes up the non-arbiter devices. When the arbiter is in

low power mode it is awakened by a request signal from the other devices. However, Poisner does not show the claimed sequence of issuing a request, putting the requester in low power mode, receiving the grant, and then reapplying clock signals to the requester.

6. The Arends reference cited by applicant shows receiving a request and placing a core processor, not the requesting device, into low power mode; granting the bus to the requester and keeping the core processor in low power mode while the other device has ownership of the bus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn A. Auve whose telephone number is (571) 272-3623. The examiner can normally be reached on M-F 8:00 AM-5:30 PM, every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (571) 272-3632. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
